

SUDOKU XV - liar

Fill in the whole grid with numbers from 1 to 9 so that no digit is repeated within a row, a column or an outlined 3x3-block. All pairs of orthogonally adjacent cells containing numbers whose sum is exactly 10 have been marked with X. All pairs of orthogonally adjacent cells containing numbers whose sum is exactly 5 have been marked with V. All marked symbols except one are correct – i.e. all but one indicate the sum of the numbers in two adjacent cells. It is a part of the solution to discover which of the given symbols is redundant.

	X		V		X
9	V	3			
8		4		X	
	9			5	4
		V			8
				4	7
				X	
V			X		V
