

Puzzle is designed for:  
Serbian Puzzle Championship 2018

### MAGIC SUMMER

Place a digit from 1 to 5 into some cells so that each digit appears exactly once in each row and column. The digits in the grid connect with horizontally and vertically adjacent digits to form multi-digit numbers. The numbers outside the grid indicate the sums of the numbers appearing in the respective rows and columns, where empty cells separate numbers.

### ZOMER

Plaats de cijfers 1-5 zodat elk cijfer in elke kolom en elke rij een keer voorkomt. De cijfers die horizontaal of verticaal aangrenzen vormen getallen. De getallen buiten het diagram geven de som van alle getallen in de betreffende rij of kolom.
