### ARAF

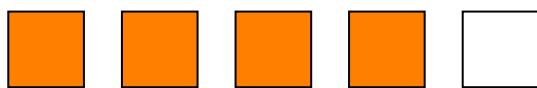

Verdeel het diagram in gebieden van horizontaal en/of verticaal aangrenzende vakjes. Elk gebied bevat twee cijfers. De oppervlakte van elk gebied ligt **tussen** de waarden van beide cijfers in het gebied.

### ARAF

Divide the grid into regions of horizontally and/or vertically connected cells. Each region must contain exactly two clue cells. The size of each region must be a value strictly **between** the two numbers in the region.
