THREE IS A CROWD SUDOKU

Plaats de cijfers 1-9 precies één keer in elke rij, kolom en 3x3-blok.

De aanwijzingen buiten het diagram geven aan welke drie cijfers moeten worden geplaatst in de eerste drie vakjes vanaf die kant. Echter, exact één cijfer van elk drietal is fout. Aan alle kanten van het diagram (boven, onder, links, rechts) zijn de negen foute cijfers verschillend.

THREE IS A CROWD SUDOKU

Place the digits 1-9 exactly once in each row, column and 3x3 block.

Clues outside the grid show the three numbers that have to be placed in the first three cells from that side. However, exactly one digit of each triplet is wrong. On each side of the grid (top, bottom, left, right) the nine wrong clues are different.
