

16 SEPTEMBER 2026

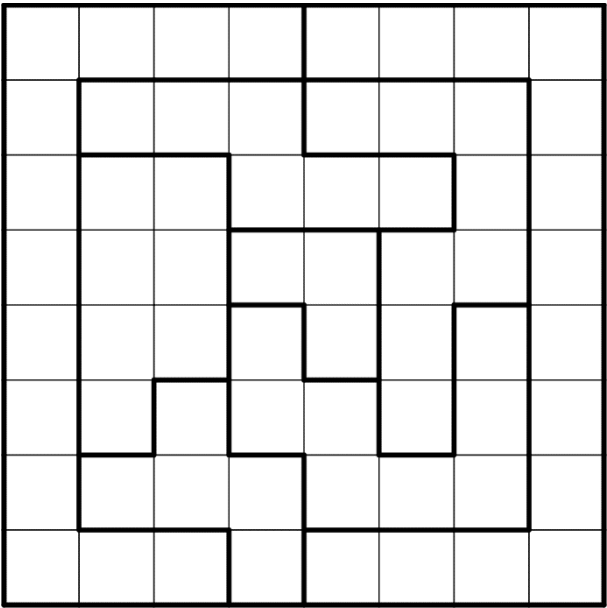

VAMA

Kleur sommige vakjes, zodanig dat iedere rij, kolom en vetomrand gebied precies twee gekleurde vakjes bevat. Alle gekleurde vakjes zijn met elkaar verbonden, orthogonaal of diagonaal.

VAMA

Shade some cells such that each row, column, and outlined region contains exactly two shaded cells, and all shaded cells are connected to one another, orthogonally or diagonally.
